Youth Soccer Coed Grades 1-8 Girls Grades 1-8

The Brookline Youth Soccer leagues are designed as learning soccer game programs and are open to all children who live in Brookline or attend a Brookline public or private school. Children are assigned to play on one team throughout the spring season. Most teams are composed of children from the same neighborhood school. Children who played on a BY Soccer team in the previous fall season will be returned to their fall team for the spring season as long as they register by March 1. New players are given an official BY Soccer team shirt while returning team players wear the team shirt given to them last fall. All participants must provide their own shin guards, athletic footwear, and a soccer ball. Many teams make up a league and each Saturday your child's team will play a different opponent team in that league. Every BY Soccer team will play a one hour game on Saturdays and also may have a weeknight one hour team practice, depending upon coach availability. Two parent volunteer coaches are needed for each team. Each player can expect equal playing time in every game. Participants in grades 1-2 need to provide their own #3 ball, in grades 3-6 a #4 ball, and in grades 7-8 a #5 ball.

What is Recreation Therapy?

Recreation Therapy is a form of therapy that uses leisure modalities and the things you like to do to increase functional independence, reduce barriers related to recreation, and improve the overall quality of life for individuals living with disabilities. "Recreation Therapy means, a treatment service designed to restore, remediate, and rehabilitate, a person's level of functioning and independence in life activities, to promote health and wellness as well as reduce or eliminate the activity limitations and restrictions to participation in life situations caused by an illness or disabling condition." - American Therapeutic Recreation Association (ATRA).

Why is Recreation Therapy so Important?

Research supports the concept that people with active, satisfying lifestyles will be happier and healthier. Recreation Therapy provides services, and treatment which are based on the individuals' interests and lifestyle. This allows them to better engage in therapy and apply these functional improvements in all areas of their life. For individuals who have functional deficits and a need for therapy, Recreation Therapy services which integrate the client's lifestyles and natural environments are often the most clinically appropriate manner to achieve meaningful outcomes. Recreation Therapy allows for better generalization to enhance individuals' functional orientation to treatment. Put simply, Recreation Therapy works to improve individuals' functioning and keep them as active, healthy and independent as possible in their chosen life pursuits.

Mission:

The mission of the Recreation Therapy Division of the Brookline Recreation Department is to provide effective, Therapeuticbased programs for youth through adult populations who have disabling conditions and/or illnesses in an effort to promote positive growth, development, and independence.
